

# Subject Index

## Volume 46

**Absorptiometry**, 537  
dual photon; spinal bone density in postmenopausal women, 685

**Abstracts**: International Symposium on Clinical Nutrition, 525

**Activity**. *See* Physical activity

**Adipocytes**, tocopherol in, 488

**Adipose tissue**  
fatty acid composition, racial differences, 41  
tocopherol distribution and intracellular localization, 488

**Adolescents**  
body fat distribution and hyperinsulinemia, 403  
female: folacin status, 302  
lactating, bone mineral status, 319  
vitamin/mineral supplementation, iron status and, 665

**Age/aging**. *See also* Geriatric client  
and exercise effect on vitamin B-6 metabolism in women, 995  
immunocompetence and, 659  
plasma retinol and, 989  
serum protein concentration and bone mineral content and, 614

**Albumin**  
response to protein-calorie malnutrition (monkey), 941  
serum, bone mineral content and, 614

**Alcoholism**, folic acid deficiency and folate bioavailability (monkey), 503

**Aluminum deposition**, bone histology and, in parenteral nutrition, 673

**American Board of Nutrition**, perspectives and general direction, 383

**Amino acids**  
blood amino acid profiles in chronic renal failure after ingestion of amino acids, 949  
dialysis solutions, for CAPD in pediatric patient, 22  
dispensable, 593  
indispensable, 593  
metabolism, kinetics of, 709  
during pregnancy, protein intake and, 243

**Anemia**, iron deficiency, 1029

**Anorexia**. *See* Eating disorders

**Anthropometry**, 537  
international growth reference, 736  
Z-score anthropometric indicators, interpretation, 749

**Anticonvulsant therapy**, circulating thyroxine, RBP, and vitamin A levels and, 360

**Appetite**  
dietary fiber intake and, 812  
in Prader-Willi syndrome, 277

**Arginine**, indispensability of, 593

**Ascorbic acid (vitamin C)**, plasma, in elderly client, vitamin C intake and, 290

**Aspartame**, clinical testing, 204

**Aspartate**, plasma, aspartame ingestion and, 204

**Autoimmunity**, copper deficiency and, in NZB mouse, 1035

**Bacteria**  
in bypassed biliopancreatic intestinal segment, 273  
colonic, in premature infant, carbohydrate absorption and, 456  
fecal, diet and, 962

**Beikost**, 171

**Bile acids**, fecal, diet and, 962

**Biliopancreatic bypass**, microbial flora of bypassed segment, 273

**Bleeding time**, fish diet and, 424

**Blood carnitine**, distribution of, 734

**Blood glucose**, legumes and, phytic acid and calcium and, 467

**Blood pressure**, fish diet and, 424

**Body composition**  
assessment of, 537  
during caloric restriction, with/without exercise, 893  
changes during weight loss, TOBEC monitoring, 5, 9  
extracellular water. *See* Water, extracellular  
in obese women, exercise and food restriction and, 622  
in Peruvian children with short stature and high weight for height, 411  
in prediction of resting metabolic rate, 875

**Body fat**, distribution of, hyperinsulinemia and, 403

**Body water**, total  
assessment of, 537  
in Peruvian children with short stature and high weight for height, 411

**Body weight**  
control of, low-fat diet and, 886  
physical activity and, 451

**Bone density**  
in collegiate women, diet, exercise, and menstrual status and, 681  
in postmenopausal women, dietary calcium intake and, 685

**Bone disease**, parenteral nutrition and, 673

**Bone histology**, aluminum deposition and, in parenteral nutrition, 673

**Bone mineral content**  
in aging normal men, 614  
of lactating adolescent and adult women, calcium intake and, 319

**Book reviews**  
*Clinical Nutrition in Gastroenterology*, RV Healey, MJ Losowsky, and J Kelleher (eds), 869  
*Nutritional Anthropology*, Francis E Johnston (ed), 1058  
*Parents' Guide to Nutrition*, Susan Baker, 869  
*Role of Selenium in Nutrition*, GF Combs, Jr and SB Combs, 124  
*Vitamin A Deficiency and Its Control*, J Christopher Bauernfeind (ed), 378  
*Weaning: Why, What, and When?* Angel Ballabriga and Jean Rey (eds), 124

**Breast cancer**  
folate conjugase activity in plasma and tumor tissue, 295  
among Seventh Day Adventists, dietary factors, 905

**Breast development**, during pregnancy and lactation, wheat gluten diet and (rat), 250

**Breast-feeding**  
history of, 168  
in 1970s and 1980s, 171

**Bulimia**. *See* Eating disorders

**Calcium**  
absorption: glucose polymers and, 699  
in osteoporosis, oral 1,25-dihydroxycholecalciferol and, 315  
dietary: bone density of spine and, in postmenopausal women, 685  
bone mineral status and, in lactating adolescent and adult women, 319

Calcium (*continued*)  
 dietary fiber and, 307  
 starch digestion and, 467  
 status, in elderly client, calcium and vitamin D supplementation and, 324

Caloric density of diet, caloric compensation and, 886  
 Caloric intake, compensation according to caloric density of diet, 886  
 Caloric restriction, reduced energy expenditure during, exercise training and, 893

Calorimetry, indirect  
 energy requirements and expenditure of lean and overweight women, 13  
 in reappraisal of caloric requirements, 875

CAPD. *See* Peritoneal dialysis, continuous ambulatory

Carbohydrate(s)  
 absorption, in premature infant, 456  
 high glycemic index, glycemic response to, in IDDM children, 798  
 low glycemic index, glycemic response to, in IDDM children, 798  
 malabsorption, flatulence and, 61  
 tolerance to, low glycemic index diet and, 968

Carbonyl iron, for iron deficiency anemia, 1029

Cardiovascular system, function and morphology, fish oil diet and (pig), 258

Carnitine  
 ketogenic effects in total parenteral nutrition (rat), 47  
 plasma, lysine loading and, 772  
 plasma and red blood cell compartments of, 437  
 in polymorphonuclear leukocytes, mononuclear cells and platelets, 734  
 status, 437  
 urinary, lysine loading and, 772

Carotene, serum, in undernourished elderly client, 849

Children  
 body fat distribution and hyperinsulinemia, 403  
 cognitively delayed, anticonvulsants and circulating thyroxine, RBP, and vitamin A levels, 360  
 continuous ambulatory peritoneal dialysis, amino acid-based vs glucose-based dialysis solutions for, 22  
 cystic fibrosis, protein metabolism in, taurine supplementation and, 606  
 insulin-dependent diabetes in, response to high- or low-glycemic index breakfast, 798  
 Prader-Willi syndrome, 277  
 preschool-aged, anthropometric and mortality data, nutritional status and, 369  
 vitamin/mineral supplementation, iron status and, 665  
 vitamin A status: infection and, 91  
 relative dose response test, 286

Cholecalciferol, intestinal absorption, in cholestatic liver disease, 1011  
 Cholestasis, intestinal absorption of cholecalciferol and 25-hydroxy-cholecalciferol in, 1011

Cholesterol  
 dietary, serum cholesterol, lipoproteins and plasma coagulation factors and, 52  
 high density lipoprotein, physical activity and, in Western Samoan men, 577  
 in  $\alpha$ -linolenic acid deficiency, ethyl linolenate therapy and, 570  
 serum, high-egg, low-fat intake and, 52  
 total, physical activity and, in Western Samoan men, 577

Chromatography, gas-liquid, capillary column, fecal short-chain fatty acid analysis, 641

Citrulline, indispensability of, 593

Coagulation factors, plasma, high-egg, low-fat intake and, 52

Colorectal cancer, diet and, 962

Complement C3, serum, nutritional status of elderly client and, 849

Computed tomography, body composition, 537

Computers, in integrated approach to characterization and management of obesity, NIDDM, hyperlipidemia and hypertension, 726

Copper  
 balance studies, in housebound elderly client, 353  
 dietary fiber and, 307  
 leukocyte concentration, copper balance and, 353

Copper deficiency, autoimmunity and, in NZB mouse, 1035  
 Corticosterone, and lactational performance in malnourished rat, 926  
 C-peptide:insulin molar ratio, carbohydrate or carbohydrate-fat meal and, 976

Creatinine, serum, nutritional status of elderly client and, 849  
 Curry powder, iron fortified, iron absorption and, 335

Cysteine, indispensability of, 593

Cystic fibrosis, protein metabolism in, taurine supplementation and malnutrition and, 606

Densitometry, 537

Diabetes mellitus  
 in Australian Aborigine, carbohydrate digestion and, 282  
 gestational, amino acids in, protein intake and, 243  
 insulin-dependent, glycemic response to low glycemic index breakfast, 798  
 noninsulin-dependent type II, characterization and management, computers in, 726  
 serum glucose and insulin response to sugars, protein dose and, 474

Diamine oxidase index, vitamin B-6 status in pregnancy, 563

Diarrhea  
 morbidity, in malnourished Bangladeshi children, cellular immunocompetence and, 115  
 vitamin A deficiency and, 827

Diet  
 carbohydrate: and exercise effect on vitamin B-6 metabolism in women, 995  
 peripheral plasma C-peptide and insulin levels and, 976  
 carbohydrate-fat, peripheral plasma C-peptide and insulin levels and, 976  
 fat content, caloric compensation for, 886  
 fish, effect on blood pressure, bleeding time, and hematologic and chemical parameters in men, 424  
 lacto-ovo-vegetarian, fecal bile acids, neutral steroids and bacteria and, 962  
 low glycemic index: metabolic effects, 968  
 traditional starch foods in, for hyperlipidemia, 66  
 supplementation, during pregnancy, infant birthweight and, 912  
 vegan, fecal bile acids, neutral steroids and bacteria and, 962

Diet-hormone interrelationships, 905

Digestive enzymes, in suckling rat, maternal malnutrition during pregnancy and lactation and, 36

Dihydrofolate reductase, inhibitors of, folate transport and absorption and, 518

1,25-Dihydroxycholecalciferol, oral, calcium absorption in osteoporosis and, 315

Docosahexanoic acid, in phospholipids of plasma, platelets and RBC membranes, fish oil infusion and (rabbit), 936

Eating disorders, taste responsiveness and, 442

Education  
 Health Learning Systems approach, 198  
 Ross Conferences, 192

Eicosanoids, ethyl linolenate therapy and, 570

Eicosapentaenoic acid, in phospholipids of plasma, platelets and RBC membranes, fish oil emulsion infusion and (rat), 936

Electrical conductance, body composition and, 5, 537

Energy intake, psyllium gum and wheat bran and, 812

Energy expenditure  
 by lean and overweight women, 13  
 resting, during caloric restriction, exercise training and, 893

Energy metabolism, fasting and, 557

Energy requirements, of lean and overweight women, 13

Enzyme(s), serum, fish diet and, 424

Erythrocyte(s)  
 carnitine, 437, 734  
 fatty acid composition: ethyl linolenate therapy and, 570  
 gallstones and, 110  
 folacin levels, in adolescent female, 302  
 selenium concentration, in pregnant and postpartum lactating and nonlactating women, dietary Se intake and, 694

Estrogens, diet and, 905

Ethanol metabolism, zinc status and nutriture and, 688

Exercise

- aerobic, in obese women, body composition and metabolic rate and, 622
- in college women, interrelation with diet, menstrual status and bone density, 681
- submaximal, thermogenic and nitrogen response to, 237
- vitamin B-6 metabolism in women and, diet, training and age and, 995

Exercise training, and resting energy expenditure during caloric restriction, 893

Eye,  $\alpha$ - and  $\gamma$ -tocopherol levels in, 481

Fasting, leucine, glucose and energy metabolism after, 557

Fats, dietary

- gallstones and, 110
- noncaloric substitute for, body composition and (rat), 784
- in regulation of energy intake, 886
- taste responsiveness to, eating disorders and, 442

Fatty acids

- in adipose tissue, racial differences, 41
- in erythrocytes, 110, 570
- essential: deficiency of, home parenteral nutrition and, 419
- ethyl linoleate therapy and, 570
- in phospholipids of plasma, platelets, and RBC membranes, fish oil infusions and (rabbit), 936
- short-chain, fecal, capillary gas-liquid chromatography, 641

FDA, food safety, 216

Feces

- bile acids, neutral steroids and bacteria in, diet and, 962
- short-chain fatty acids in, capillary gas-liquid chromatography, 641

Ferrous sulfate, for iron deficiency anemia, carbonyl iron vs, 1029

Fiber, dietary

- in athletic college women, menstrual dysfunction and, 681
- energy intake and, 812
- food gum viscosity and hypoglycemic action, 72
- gastric mucosal effects (rat), 980
- high-fiber breakfast, and plasma glucose and insulin responses to lunch, 804
- intake in US population, 790
- mean transit time, analysis of single stool, 1048
- measurement of, 873
- mineral balance and, 307
- vitamin B-6 status and bioavailability in vegetarian women and, 647

Fibrinogen, plasma, high-egg, low-fat intake and, 52

Filer, Lloyd Jackson, Jr, 162

Fish, dietary, effect on blood pressure, bleeding time, and hematologic and chemical parameters in men, 424

Fish oil

- cardiac function and morphology and (pig), 258
- intravenous infusion, platelet aggregation and fatty acid composition in phospholipids and (rabbit), 936

Flatulence, fructo-oligosaccharide ingestion and, 61

Flavin metabolites in urine, 830

Folacin status, in adolescent female, 302

Folate, 387

- metabolism, in nonpregnant women, 1016
- requirements, in nonpregnant women, 1016

Folate conjugase, in plasma and tumor tissue of breast cancer patient, 295

Folic acid

- absorption: pyrimethamine and, 518
- trimethoprim and, 518
- zinc absorption and, 835

Folic acid deficiency, alcoholism and folate bioavailability (monkey), 503

Food additives, 201

- aspartame, 204
- interaction of food industry with academic community on, 216
- safety of, 216

Food intake, dietary fiber and, 812

Food processing, wheat products, glycemic index of, 631

Food restriction, in obese women, body composition and metabolic rate and, 622

Formula feeding

- history of, 168
- interaction of infant formula industry with academic community, 221
- in 1970s and 1980s, 171

Fructo-oligosaccharides, flatulence and, 61

Gallstone disease, dietary fatty acids and, 110

Gas. *See* Flatulence

Gastric acid, secretion, curry powder and, 335

Gastric mucosa, dietary fiber effects on (rat), 980

Gastrointestinal motility, mean transit time, analysis, 1048

Geriatric client

- ascorbic acid intake and plasma levels, 290
- calcium metabolism, calcium and vitamin D supplementation and, 324
- housebound, zinc and copper balance studies, 353
- nutritional status, biochemical markers, 849
- protein nutriture in free-living healthy population, 586
- pyridoxine supplementation and lymphocyte response in, 659
- vitamin A intake and plasma retinol levels, 989
- vitamin D status in, 1005
- zinc nutriture and immunity, 101

Glucose

- calcium absorption and, 699
- metabolism: in Asian Indian and American vegetarians, 955
- fasting and, 557
- plasma: postprandial, second meal response, 804
- response to starch foods in Australian Aborigine, 282
- postprandial, fish oil diet and (pig), 258
- serum, response to sugars, protein dose and, 474

Glucose polymers, calcium absorption and, 699

Glutathione peroxidase, in human milk, maternal selenium status and, 95

Glycemic index

- of diet, metabolic effects, 968
- processed wheat products, 631

Growth and development

- international growth reference, 736
- weight growth patterns of nutritionally at-risk and well-nourished infants, 31

Guar, gastric mucosal effects (rat), 980

Guar gum, hypoglycemic action, 72

Hair analysis, 233

Health Learning Systems, 198

Hematologic parameters, fish diet and, 424

Hemochromatosis, screening for, 840

Hemodialysis, protein turnover in whole-body, 778

Herman Award Lecture

- 1986, 387
- 1987, 726

Hip fracture, vitamin D status and, 1005

Histidine, indispensability of, 593

Hydrogen ( $H_2$ ) breath test

- gaseous response to fructo-oligosaccharides, 61
- in premature infant, 456

25-Hydroxycholecalciferol

- intestinal absorption, in cholestatic liver disease, 1011
- oral, calcium absorption in osteoporosis and, 315

10-Hydroxyethylflavin, in urine, 830

7 $\alpha$ -Hydroxyriboflavins, in urine, 830

8 $\alpha$ -Hydroxyriboflavins, in urine, 830

Hypercalcemia, vitamin D-induced, in infants on high-dose vitamin D prophylaxis, 652

Hyperglycemia, postprandial, food gum viscosity and, 72

Hyperinsulinemia, in children and adolescents, body fat distribution and, 403

Hyperlipidemia

- characterization and management, computers in, 726
- low-glycemic-index diet in, 66

Hypertension, characterization and management, computers in, 726

Ice cream/ice milk, lactose digestion from, by lactase-deficient persons, 636

Immunity  
cellular, and diarrheal morbidity in malnourished Bangladeshi children, 115

iron deficiency and, 329  
in rat, 346

zinc nutriture and, in elderly, 101

Immunoglobulins, in intestinal mucosa, iron deficiency and (rat), 341

Immunology, copper deficiency (animals), 1035

Infant(s)  
birthweight, prenatal maternal dietary supplementation and, 912

continuous ambulatory peritoneal dialysis, amino acid-based vs glucose-based dialysis solutions for, 22

feeding practices history of, 168  
in 1970s and 1980s, 171

high-dose vitamin D prophylaxis in, vitamin D metabolites, calcium and phosphorus levels and, 652

nutrition: current perspectives, 187  
Health Learning Systems approach to continuing education, 198  
interaction of infant formula industry with academic community, 221

Ross Conference approach to continuing education, 192  
vitamin E in, 1983

premature, dietary carbohydrate absorption in, 456

preterm, vitamin A status, 985

weight growth patterns, nutritionally at-risk vs well-nourished infants, 31

Infection  
iron deficiency and, 329

vitamin A status in children and, 91

Insulin  
peripheral plasma level, diet and, 976

plasma, response to starch foods in Australian Aborigine, 282

postprandial: fish diet and (pig), 258  
second meal response, 804

response to processed wheat products, 631

response to sugars, protein dose and, 474

secretion, low glycemic index diet and, 968

Interleukin 1, in leukocytes, iron deficiency and (rat), 346

Intestinal mucosa, in iron deficiency, immunoglobulin-containing cells in (rat), 341

Intestine, small, development in suckling rat, maternal malnutrition during pregnancy and lactation and, 36

Iron  
absorption: curry powder and, 335  
from Gambian meal, measurement of, 844

deficiency. *See Iron deficiency*  
dietary fiber and, 307

in nutrition, 387

overload, screening for, 840

status, vitamin/mineral supplementation vs dietary intake, 665

Iron deficiency  
immune response and, 329

intestinal mucosal effects, immunoglobulin-containing cells in (rat), 341

leukocyte interleukin 1 in (rat), 346

Iron deficiency anemia, carbonyl iron for, 1029

Karaya gum, dietary, mineral balance and, 307

Keto acids, branched-chain, plasma levels in obesity, sex-specific differences in, 58

Ketogenesis, carnitine and, during total parenteral nutrition (rat), 47

Kidney  
failure. *See Renal failure*  
function, fish diet and, 424

Lactase deficiency, lactose digestion from yogurt, ice milk and ice cream, 636

Lactation  
bone mineral status during, calcium intake and, 319  
in malnourished rat, 926

digestive organ development in suckling offspring, 36

maternal selenium status during, milk selenium concentration and glutathione peroxidase activity and, 95

maternal selenium intake during, plasma, erythrocyte and breast milk selenium concentration, 694

wheat gluten diet during, effect on mammary gland development and pup viability (rat), 230

Lactose intolerance, lactose digestion from yogurt, ice milk and ice cream, 636

Lactose malabsorption, 636

Legumes  
in breakfast meal, plasma glucose and insulin responses to lunch and, 804

glycemic response to, phytic acid and calcium and, 467

Letters to the editor, 121, 374, 523, 702, 862, 1055

Leucine metabolism, fasting and, 557

Leukocyte(s)  
polymorphonuclear. *See Polymorphonuclear leukocytes*  
zinc and copper concentrations, zinc and copper balance and, 353

$\alpha$ -Linolenic acid deficiency, ethyl linolenate therapy, 570

Lipid(s)  
metabolism, low glycemic index diet and, 968

peroxidation, breath pentane excretion and, 267

plasma levels, fish oil diet and (pig), 258

Lipoproteins, serum, high-egg, low-fat intake and, 52

Liver disease, vitamin A status, relative dose response test, 286

Locust bean gum  
hypoglycemic action, 72

mineral balance and, 307

Lumiflavin, in urine, 830

Lung injury, mechanical ventilation for, nutritional changes during (baboon), 900

Lymphocyte responsiveness, in elderly, pyridoxine supplementation and, 659

Lysine loading, plasma and urinary trimethyllysine levels and, 772

Magnesium, dietary fiber and, 307

Magnetic resonance imaging, body composition, 537

Malnutrition  
in infants, weight growth patterns, 31

during pregnancy and lactation, digestive organ development in suckling rats and, 36

protein-calorie: in elderly client, biochemical markers of, 849  
plasma albumin and transferrin responses to (monkey), 941

Manganese, dietary fiber and, 307

McCullum Award Lecture, 709

Mechanical ventilation, nutrition during (baboon), 900

Menstrual dysfunction, in athletic college women, dietary fiber intake and, 681

Metabolic rat, resting  
in obese women, exercise and food restriction and, 622  
prediction equations for, 875

Methanol, plasma levels, aspartame ingestion and, 204

Methylation, negative nitrogen balance and, 496

3-Methylhistidine, urinary excretion, submaximal exercise and, 237

Metronidazole, effect on microbial flora of bypassed biliopancreatic intestinal segment, 273

Midarm circumference, and biochemical markers, in evaluation of nutritional status of elderly client, 849

Milk  
human, selenium concentration, dietary intake of Se and, 694  
maternal selenium status and, 95

yield and composition in malnourished rat, 926

Mineral supplementation, iron status and, 665

Mononuclear cells, carnitine in, 734

Mortality, in preschool children from Guinea-Bissau, nutritional status and, 369

Muscle metabolites, assessment of, 537

Muscle wasting, in chronic renal failure, protein turnover and, 778

Naloxone, and eating behavior in Prader-Willi syndrome, 277

Neutral steroids, fecal, diet and, 962

Neutron activation analysis  
body composition, 537  
iron absorption from Gambian meal, 844

Nicotinamide, methylation, nitrogen balance and, 496

Nitrogen  
metabolism, low glycemic index diet and, 968  
urinary excretion, submaximal exercise and, 237

Nitrogen balance  
negative, synthesis of methylated compounds during, 496  
during total parenteral nutrition in septic patient, 1040

Nutrition  
in chronic renal failure, blood amino acid profiles after ingestion of amino acids, 949  
in collegiate women, interrelationship with exercise, menstrual status and bone density, 681  
during continuous ambulatory peritoneal dialysis in infants and children, 22  
in cystic fibrosis, protein metabolism and, 606  
infant feeding  
Health Learning Systems approach to continuing education, 198  
history of, 168  
interaction of infant formula industry with academic community, 221  
in 1970s and 1980s, 171  
Ross Conference approach to continuing education, 192  
vitamin E in, 183, 187

lactation and, 926  
maternal, selenium status during lactation, 95  
during mechanical ventilation (baboon), 900  
postsurgical patient, intravenous oligosaccharides for, 461  
in pregnant Mexican women, 563  
total parenteral. *See* Parenteral nutrition, total

Nutrition science, 387

Nutritional status  
anthropometric and mortality data in preschool children from Guinea-Bissau, 369  
deterioration of, cellular immunocompetence and, 115  
in elderly clients, biochemical markers, 849  
international growth reference, 736  
Z-score anthropometric indicators from, 749  
vitamin C, 818  
in vitamin/mineral supplementation, 665  
weight-for-height parameter, 411

Oat bran, gastric mucosal effects (rat), 980

Obesity  
body composition and metabolic rate in, exercise and food restriction and, 622  
branched-chain keto acid levels, sex-specific differences, 58  
characterization and management, computers in, 726  
in children and adolescents, hyperinsulinemia and, 403  
noncaloric fat substitute in, body composition and (rat), 784  
physical activity in, 451  
in Prader-Willi syndrome, 277  
regulation in energy intake for, 886

Oligosaccharides, intravenous administration, in postsurgical patient, 461

Ornithine, indispensability of, 593

Osteopenia, senile, protein metabolism and bone mineral content and, 614

Osteoporosis  
calcium absorption in, oral 1,25-dihydroxycholecalciferol and, 315  
in postmenopausal women, dietary calcium intake and, 685

Oxygen toxicity, vitamin E for, 187

Oxygen uptake (consumption)  
maximum, during caloric restriction, exercise training and, 893  
submaximal exercise and, 237

Pancreas, development in suckling rat, maternal malnutrition during pregnancy and lactation and, 36

Parathyroid hormone, serum, in elderly client, calcium and vitamin D supplementation and, 324

Parenteral nutrition  
at-home, essential fatty acid deficiency and, cutaneous safflower oil for, 419  
intravenous feeding, thermogenic and nitrogen response to submaximal exercise and, 237  
oligosaccharides for postsurgical patient, 461  
total: ketogenic effects of carnitine during (rat), 47  
nitrogen intake in septic patient, 1040

Pectin, gastric mucosal effects (rat), 980

Pellagra, 511

Pentane breath test, vitamin E status, 267

Peritoneal dialysis, continuous ambulatory, in pediatric patients, amino acid-based vs glucose-based dialysis solutions, 22

Phenylalanine, plasma, aspartame ingestion and, 204

Phospholipids  
cardiac membrane, fish oil diet and (pig), 258  
fatty acid content, fish oil emulsion infusion and (rabbit), 936

Physical activity. *See also* Exercise  
body weight and, 451  
plasma total and HDL cholesterol levels and, in Western Samoan men, 577

Phytic acid, starch digestion and, 467

Picolinic acid, zinc nutriture and, 511

Platelet(s)  
aggregation, fish oil emulsion infusion and (rabbit), 936  
carnitine in, 734

Platelet count, fish diet and, 424

Polymorphonuclear leukocytes (PMNs), carnitine in, 734

Polysioxane, as fat substitute, body composition and (rat), 784

Population screening, for iron overload, 840

Prader-Willi syndrome, feeding patterns in, 277

Prealbumin, serum, nutritional status of elderly client and, 849

Pregnancy  
amino acids in, protein intake and, 243  
dietary supplementation during, infant birthweight and, 912  
malnutrition during, digestive organ development in suckling rat and, 36  
outcome, zinc status and, 763  
vitamin B-6 status during, 563  
wheat gluten diet during, effect on mammary gland development and pup viability (rat), 250  
zinc status during, 563  
pregnancy outcome and, 763

Prolactin  
diet and, 905  
and lactational performance in malnourished rat, 926

Prostacyclin (PGI). *See* Eicosanoids

Protein  
dietary intake: amino acid response to, in pregnant and gestational diabetic women, 243  
bone mineral content and, 614  
in free-living healthy elderly people, 586  
serum glucose and insulin responses to sugars and, 474  
serum level, in aging normal men, 614  
turnover: in chronic renal failure, 778  
in cystic fibrosis, taurine supplementation and malnutrition and, 606

Protein-calorie malnutrition. *See under* Malnutrition

Pylium gum, energy intake and, 812

Pyridoxal, plasma levels, pyridoxine supplementation and, 78

Pyridoxal-5'-phosphate, plasma, pyridoxine supplementation and, 78  
in elderly client, 659

Pyridoxine  
metabolism, in sickle cell disease, riboflavin and, 86  
supplementation: in elderly, lymphocyte responses and, 659  
plasma pyridoxal-5'-phosphate and pyridoxal levels and, 78

Pyrimethamine, intestinal folate transport and absorption and, 518

Race, fatty acid composition of adipose tissue and, 41

RBP. *See* Retinol-binding protein

Relative dose response (RDR) test, vitamin A status, 286  
and infection in children, 91

Renal failure, chronic  
blood amino acid profile in, following amino acid ingestion, 949  
in infants and children, CAPD in, 22  
muscle wasting in, protein turnover and, 778

Research  
university-based, industry support for, 226  
university-industry partnership in, 229

Respiratory disease, vitamin A deficiency and, 827

Response surface method, taste and eating disorders, 442

Retinol, plasma, in elderly clients, vitamin A intake and, 989

Retinol-binding protein (RBP)  
circulating levels, anticonvulsants and, 360  
interstitial, and intraocular transport of  $\alpha$ -tocopherol, 481

Retinol dose response test, in preterm infants, 985

Riboflavin  
status, pyridoxine metabolism and, in sickle cell disease, 86  
urinary, 830

Ross Conference, 192

Safflower oil, topical, for essential fatty acid deficiency in patients on home parenteral nutrition, 419

Selenium  
dietary, during pregnancy and lactation, plasma, erythrocyte and breast milk Se concentration, 694  
plasma, in pregnant and postpartum lactating and nonlactating women, dietary Se intake and, 694  
status, in mother, milk Se concentration and glutathione peroxidase activity and, 95

SI units: style specifications and conversion tables, 135-150

Sickle cell disease, riboflavin and pyridoxine metabolism in, 86

Sodium bromide, oral, for extracellular water measurement, 1

Starch  
dietary: digestion of, phytic acid and calcium and, 467  
low glycemic index, for hyperlipidemia, 66  
plasma glucose and insulin response to in Australian Aborigine, 282

digestibility, in processed wheat products, 631

gelatinization, in processed wheat products, glycemic and insulin responses to, 631

resistant, 873

Sugar, taste responsiveness to, eating disorders and, 442

8 $\alpha$ -Sulfonylriboflavin, in urine, 830

Sunlight exposure, vitamin D status and, in hip fracture patient and in elderly controls, 1005

Taste responsiveness, eating disorders and, 442

Taurine  
indispensability of, 593  
supplementation, in cystic fibrosis, protein turnover and, 606

Thyroxine, circulating levels, anticonvulsants and, 360

TOBEC (total body electrical conductivity), for monitoring body composition changes during weight reduction, 5  
cross-validation study, 9

Tocopherol. *See also* Vitamin E  
 $\alpha$ -Tocopherol  
in adipose tissue, 488  
in human eye, 481

$\gamma$ -Tocopherol, in human eye, 481

Toxicology  
aspartame testing, 204  
food additives, 216

Trace elements, hair analysis, 233

Transferrin, response to protein-calorie malnutrition (monkey), 941

Triceps skinfold, and biochemical markers, in evaluation of nutritional status of elderly clients, 849

Triglycerides  
ethyl linoleate therapy and, 570  
serum levels, low glycemic index diet with traditional starchy foods and, 66

Trimethoprim, intestinal folate transport and absorption and, 518

Trimethyllysine, plasma and urinary levels, lysine loading and, 772

Tryptophan deficiency, pellagra and, 511

Tyrosine, indispensability of, 593

University/industry relationships, 226, 229

Urine  
flavin catabolites in, 830  
vitamin B-6 excretion, pyridoxine supplementation and, 78

Vegetarians  
diet-hormone interrelationships in, 905  
glucose homeostasis in, 955  
vitamin B-6 status and bioavailability in, 647

Vitamin A  
circulating levels, anticonvulsants and, 360  
intake, plasma retinol levels and, in healthy elderly clients, 989  
status: of preterm infant, 985  
relative dose response test, 286

Vitamin A deficiency, respiratory disease and diarrhea and, 827

Vitamin B-6  
bioavailability, in vegetarian women, 647  
metabolism, in women, exercise, diet and age and, 995  
status: during pregnancy, 563  
in vegetarian women, 647  
urinary excretion, pyridoxine supplementation and, 78

Vitamin B-12, 387

Vitamin C  
dietary, plasma ascorbic acid level and, 290  
status: biochemical indices, 818  
plasma ascorbic acid levels and, 290

Vitamin D  
dietary intake, vitamin D status and, in hip fracture patient and in elderly controls, 1005  
high-dose prophylaxis, in infants, vitamin D metabolites, calcium and phosphorus levels and, 652  
status, in hip fracture patient and in elderly controls, 1005  
supplementation, calcium metabolism in elderly client and, 324

Vitamin E  
in infant nutrition: current perspectives, 187  
history of, 183  
status: breath pentane analysis, 267  
 $\alpha$ -tocopherol distribution in adipose tissue, 488

Vitamins  
nomenclature: generic descriptors and trivial names for, 151  
supplement users, iron status and, 665

Water. *See also* Body water  
extracellular, measurement using oral sodium bromide, 1

Weight-for-height, as nutritional status indicator, 411

Weight loss  
appetite suppressant effects of fiber, 812  
body composition changes during, TOBEC monitoring, 5  
noncaloric fat substitute and, in obese rat, 784

Wheat bran, energy intake and, 812

Wheat gluten, dietary, during pregnancy and lactation, mammary gland development and pup viability (rat), 250

Wheat products, processed, glycemic and insulin responses to, 631

Xanthan, hypoglycemic action, 72

Xerophthalmia, respiratory disease in, 827

Yogurt, lactose digestion from, by lactase-deficient persons, 636

Z-score anthropometric indicators, 736  
interpretation of, 749

Zinc  
absorption, folic acid and, 835  
balance studies, in housebound elderly clients, 353  
dietary, in elderly client, 101  
dietary fiber and, 307  
leukocyte concentration, zinc balance and, 353  
metabolism, tryptophan deficiency and picolinic acid and, 511  
nutriture and immunocompetence in elderly clients, 101  
status: ethanol metabolism and, 688  
during pregnancy, 563  
outcome and, 763
